Prof. Dennis Hood
Computer Science

Team Project #3

Project Description

- Draft a process for each of the following:
 - a) Selecting an outsource partner (assessing capability, assessing risk, choosing from among several candidates)
 - b) Managing a change to a software system that your organization maintains (requests for change, estimating effort and risk, scheduling implementation, testing, and rollout)
 - c) Estimating the time and cost required to complete a software development project
 - d) Training new personnel on your organization's process
 - e) Continuously improving each of these processes
- Compile your processes into a report
 - Cover page
 - Each process gets its own section
 - Include a status report
- Submit by 11/6
